Health Service Update  
-Nursing Update

- COVID cases reducing.
- Seton provides nursing services to AISD schools. It's a unique model ensure staffing or all schools with RN or CA staff.
- There are challenges with staffing: COVID has affected staffing as there are vacancies, but the goal is to have an RN or CA at each school.
- Gold Standard: to have an RN at all campuses, but trained medical staff are made available at all campuses
- Every school also has other staff trained in medical administration. These non-medical staff are designated by principals. There are about 80 schools without medical staff. We have more CA coverage: approx.. 60/40
- Austin ISD no longer uses telehealth services.
